

Plot Layout Pre-Test

Reza

* Required

What are the dimensions of the LETS forest plot? (HINT: read the plot layout protocol) *

- 30m X 30m
- 50m X 50m
- 30ft X 30ft
- 50 ft X 50ft
- Other:

How many sub-quadrats are there in a LETS forest plot? (HINT: read the plot layout protocol)

- 4
- 7
- 9
- 16
- Other :

How many numbered points are there on the LETS forest plot?

- 4
- 8
- 12

16

In order to avoid falling, and for maximum stability, when setting up a LETS plot you should

- always walk straight up the side of the steep mountain
- walk zig-zags up the steep mountain
- never walk up the steep mountain
- run up the steep mountain

How many team members are there MINIMUM on a plot layout team?

- 1
- 2
- 3
- 4

How can TEAMWORK be used during plot layout?

- watch your team members and make sure they go in a straight line
- wave at your team members so that they know exactly where the orange tag is
- be ready to help quickly pull a string back if it is placed wrong
- all of the above

When you leave the plot at the end of the day

- leave all white strings in the forest
- roll up all white strings, the pink string, and take home in the equipment bags

- leave only the white string on the outside corners
- roll up only the pink string

When winding strings up at the end of the day, make sure that they are

- extremely tight
- snug
- a bit loose
- very loose

Each plot is marked with an _____ at each corner (northwest, northeast, southwest, and southeast).

- red tag
- orange tag
- purple flag
- a stick
